LONGMEADOW PARKWAY BRIDGE CORRIDOR

PUBLIC HEARING, JANUARY 19, 2017

Report of proceedings had at the public hearing regarding Quick Take Power in Eminent Domain had at the Kane County Government Center, 719 Batavia, 2nd Floor County Board Room, Geneva, Illinois on the 19th day of January, A.D., 2017 commencing at the hour of 4:00 p.m.

APPEARANCES:

MR. STEVE COFFINBARGAR, DIRECTOR
KANE COUNTY DIVISION OF TRANSPORTATION

MR. TIM RICKERT, DEPUTY DIRECTOR OF TRANSPORTATION AT KDOT

1 MR. COFFINBARGAR: So I am going to explain why
2 we're here today and a little bit about eminent domain,
3 and quick take. This public hearing is being held
4 pursuant to Illinois House Rule 41 in conjunction with
5 and relative to a potential request by the County of
6 Kane to be granted quick take authority by the Illinois
7 General Assembly pursuant to the Illinois compiled
8 statutes, which I have got copies, specifically of the
9 eminent domain statute and of the quick take procedures,
10 if you would like to take those.

11 Quick take authority is being sought by the
12 County of Kane only for acquisition of necessary
13 right-of-way from various property owners along
14 Longmeadow Parkway Bridge Corridor and the Huntley at
15 Galligan Road intersection improvement, and that's for
16 right of ways that the County of Kane is pursuing that
17 is left for these two roadway improvements.

18 It is important to note that the State of
19 Illinois is assisting Kane County with right-of-way
20 acquisition for the Longmeadow Parkway project at and
21 near Illinois 31, Illinois 25, and Illinois 62. Again,
22 we are here just for the parcels remaining that Kane
23 County needs to acquire.

24 The county can't commence construction of the

1 Huntley and Galligan Road project, which the exhibits
2 are here for that project, and for the Longmeadow
3 Parkway project, which are here, until -- can't commence
4 construction of these projects or continue construction
5 for Longmeadow Parkway, mainly Sections B2, which is
6 east of White Chapel Road to Illinois -- I mean east of
7 White Chapel to east of Illinois 31. Section C, which
8 is from 31, across the river, to east of 25; and
9 Section D, from 25 to 62, until we have title of all the
10 necessary right of ways -- sorry for that long-winded
11 sentence -- but we can't continue acquisition for those
12 remaining sections until we have the necessary
13 right-of-way.

14 By way of background, the County of Kane is
15 currently authorized by statute to acquire by eminent
16 domain or you might call it condemnation, those are
17 alternate names, for real property for highway purposes.
18 The eminent domain process is relatively simple and can
19 be time consuming.

20 And to explain the process, the county
21 determines what property we need to acquire to build a
22 roadway improvement. We have that property appraised by
23 State of Illinois approved appraisers. The appraisal is
24 reviewed by a review appraiser, and a state approved

1 review appraiser, and that appraisal is then sent to
2 IDOT for their approval. So it is sort of appraised and
3 then reviewed twice.

4 So once the appraisal has been approved by
5 IDOT, we can then begin negotiations with the property
6 owner, and we offer the full appraised value of the
7 property with that property owner. In the event that
8 those proceedings are not successful, the county may
9 file eminent domain proceedings and in the 16th Judicial
10 Circuit Court have the court and/or jury determine the
11 value of the desired property.

12 Eminent domain proceedings require that the
13 court determine the property's value prior to the county
14 being able to take title. This can take up to a year or
15 more for eminent domain proceedings. In the event the
16 property owner further appeals the eminent domain
17 determination made by the court to a higher court, the
18 process can take substantially longer in some cases,
19 maybe even two years.

20 So we are going to request quick take
21 authority, and if quick take authority is granted to the
22 county for the eminent domain process, the county would
23 be allowed to take title to acquired property shortly
24 after filing the eminent domain complaint. So in short,

1 after filing the complaint, a quick take motion is filed
2 in court, and the court makes a determination of the
3 amount of preliminary just compensation to be paid by
4 the county to the property owner for the desired
5 property.

6 The quick take process has two advantages.
7 The county gets title to required properties shortly
8 after filing the eminent domain complaint enabling
9 commencement of construction of the highway project, and
10 thereby saving the taxpayers from increasing
11 construction costs and delay. The further you delay a
12 project, the costs can increase 2 to 3 percent per year
13 approximately, and on a hundred and fifteen million
14 dollar project, that can add up, or in the case of
15 Longmeadow, obviously it's not that much. It is an
16 intersection improvement.

17 The property owner -- the second advantage is
18 the property owner has immediate access to the
19 preliminary just compensation which can be no less than
20 the appraised value. So they can use that money -- they
21 can use that money to fund the court case in which they
22 are fighting against the appraised value. So they have
23 access to those funds right away, and if not satisfied
24 with the appraised value, they can continue the eminent

1 domain process in court to attempt to get a higher price
2 for their property.

3 Regardless of the grant of quick take
4 authority by the general assembly, it is most important
5 to note this. The county intends to continue to
6 negotiate with all of the remaining property owners on
7 these projects. We prefer to arrive at a mutually
8 satisfied conclusion to the right-of-way acquisition
9 process. It is only in an unlikely event that the
10 negotiations are not successful that the county intends
11 to use quick take authority in conjunction with eminent
12 domain proceedings to acquire title to the necessary
13 right-of-way.

14 The county used the request that they grant
15 quick take as a belt and suspenders approach to ensure
16 that projects commence and are completed on time. So we
17 have a court reporter here tonight that you can get
18 verbal comments to. We have a place here where you can
19 provide written comments. There is staff here that can
20 give you information on the two projects, and if you
21 have any questions, please ask us.

22 THE WITNESS: What do the comments go towards?

23 MR. COFFINBARGAR: Well, we are here this evening
24 specifically for the quick take authority request, and

1 so the comments were taken in by staff and considered
2 during the process as we go through -- there are certain
3 steps we need to follow with a quick take process. So
4 we gather those comments, you know, take a look at them,
5 and we share something that you are willing to or want
6 to take a look at.

7 UNIDENTIFIED SPEAKER: Once, you declare a property
8 for eminent domain, whether it is a year, two years, no
9 matter what, the county ends up owning in eminent
10 domain?

11 MR. COFFINBARGAR: It is a lengthy process.

12 UNIDENTIFIED SPEAKER: Yeah, once it has been
13 declared -- no matter what, a year, two years.

14 MR. COFFINBARGAR: Ultimately the county board has
15 decided to go forward with the project so ultimately the
16 county board will continue to take it through the
17 process until it is owned by us.

18 UNIDENTIFIED SPEAKER: Yeah, so eminent domain it's
19 basically normally one year, two years, whatever.

20 MR. COFFINBARGAR: Quick take authority allows us
21 to purchase the homes and hang onto the property. With
22 eminent domain they do not have access to those funds
23 immediately. They have to wait until the court renders
24 a decision on the value of the property.

1 MS. BREHMER: I have a question. Do these comments
2 stay in the KDOT or do they get forwarded to the Kane
3 County board members?

4 MR. COFFINBARGAR: We will make sure -- the county
5 board will actually take action on the quick take
6 resolution and it will go to the Illinois General
7 Assembly. So we will provide comments received here
8 from the public hearing and provide that to the county
9 board members.

10 MS. BREHMER: Are you also taking written comments
11 via e-mail or is it just tonight, that hour, and that's
12 it, as far as the public comments?

13 MR. COFFINBARGAR: Well, the public comments will
14 come primarily from this public hearing, but if we
15 receive some e-mails, I am not going to say that we are
16 not going to include that as part of it. We want to
17 make sure we get as much information as possible. There
18 are about a dozen property owners that are represented
19 here and we want to make sure that the county board hears
20 from them.

21 And were those people notified by certified
22 mail about this hearing because really wasn't much
23 information out there about this hearing.

24 MR. COFFINBARGAR: They were sent certified

1 letters, the property owners, and we had it on the web
2 site and it was in the paper. That was the public
3 notice.

4 MS. BREHMER: So this is a two lane highway for 15
5 years. Why do you keep pursuing a four-lane highway?
6 There is no money. Why wasn't that looked at?

7 MR. RICKERT: The two lane, there was a financial
8 feasible study that was looked at back in 2009 that
9 considered what are some ways potentially the county can
10 offset some of the initial costs and the further
11 consideration of that ultimately ended up with the
12 project costing even more for the two lane and so as
13 well as the impact to residents along the corridor would
14 be twice, and so it was determined that it would
15 actually save the county money as well as only have one
16 impact instead of two construction impacts, and so it
17 determined that since the Phase 1 hearing that was
18 approved by the federal and state governmental agencies
19 approved the four lane, it was decided it was more
20 prudent to go forward with the four lane because of the
21 cost savings as well as the impacts.

22 MS. BREHMER: What about the trend in the
23 population with Illinois? I mean, thousands are leaving
24 the state. So, you know, the population is going down.

1 You know, are they looking into a lot of people aren't
2 commuting. They are working from home. The counts have
3 gone down by 5,000 cars.

4 It is all these exact numbers are dropping.
5 They are not increasing. So why not fix the existing
6 road. Why not fix Randall Road. You know, more traffic
7 is going to dump on Randall than Algonquin Road.
8 Randall is already not a good situation, and it is four
9 lanes. It just doesn't make sense.

10 MR. RICKERT: And everybody has a different
11 perspective. I'll kind of explain the social economic
12 value. When we look at it, we look at the population
13 projection. You are correct there has been in some
14 areas of the state a down turn in population growth.
15 This area has actually had growth. We are one of the
16 primary growth areas, Northern Kane County, at this
17 point in time.

18 We also, any federal job is done in accordance
19 with social economic value as approved by CMAP. They
20 are the agency that has oversight. The numbers that we
21 utilized were adopted in 2014 and those numbers show
22 continued growth in this area. It actually shows growth
23 of over for the four townships, in Southern Kane -- I
24 mean Northern Kane and Southern McHenry, it actually

1 shows growth of almost 200,000 people over the next 20
2 to 30 years.

3 MS. BREHMER: I know what you are going by, but
4 like lake In The Hills, everybody said the CMAP
5 information was overstated by like 300 percent and the
6 growth area you are talking about is Gilbert and those
7 areas, they can get on 90. 47 opened a new exchange.
8 They are going to take 90 to go east and west. There
9 are six lanes of traffic that are open now. None of
10 that was included in your study.

11 MR. RICKERT: It is actually all included in the
12 study. When you look at the social economic data, and
13 again, it is a forecast, and, you know, when I started
14 working for the county, the county population has more
15 than doubled. We are looking at a long-term rising.

16 When we look at the social economic data, we
17 don't say that the economy in Illinois is no good for
18 the next three decades. What we look at is what we
19 anticipate is that there will be another uptrend, and it
20 will occur as it has historically. And so we have to
21 look at the future.

22 When you look at planning the existing roads,
23 and you look at existing roads, the public has adopted
24 all of these comprehensive plans that said Longmeadow

1 was one of the ways that any growth would be addressed.
2 To say well, why don't we use existing roads. There is
3 also homes and homeowners that live along those existing
4 roads that they are relying on the public agencies
5 following the comprehensive plans that have been adopted
6 for over the last 30 years.

7 So we have this balancing act that we have to
8 do as far as where do the improvements go. Do the
9 improvements impact existing residents along roads that
10 were never planned to be upgraded, or do they go towards
11 roads that have been planned since -- I forget the
12 year -- 1970 something to be improved. So it is
13 following the comprehensive plans that the
14 municipalities as well as the county and state have
15 adopted.

16 UNIDENTIFIED SPEAKER: Can I make another
17 statement? When you and I talked on the phone, we were
18 talking about the sequence of events as to the plans for
19 the Intersections A, B, C and D. The section called D
20 starts at Algonquin Road, Illinois 62, goes across
21 Autumn Trail and ends at the woods prior to the junction
22 of Route 25.

23 MR. COFFINBARGAR: Right.

24 UNIDENTIFIED SPEAKER: Section D will not connect

1 with Route 25 until such time as the critical section,
2 Section B, over the river is completed.

3 MR. COFFINBARGAR: Section C.

4 UNIDENTIFIED SPEAKER: C. So the connection
5 between Algonquin Road and Route 25 will not be viable
6 until the bridge is completed; is that correct?

7 MR. COFFINBARGAR: Not necessarily.

8 MR. RICKERT: Well, when 25 is built which would
9 be --

10 MR. COFFINBARGAR: Currently included in C. So
11 what we did was break up the engineering into four
12 different sections. You probably talked to -- you are
13 not the only person that I talked to so I am sorry I
14 don't recall the specific conversation. We break up
15 millions of dollars of engineering to allow more than --
16 The Section C is from east of 31 to 25 currently, but
17 that doesn't mean in the future if there is a delay in
18 the bridge or those sort of things, we could break out
19 the intersection. Section D is being constructed or has
20 been constructed, there is a potential to break out an
21 intersection and tile it in.

22 UNIDENTIFIED SPEAKER: But by default Section D
23 will not make it to 25. If you are building a four-lane
24 road from the junction of Algonquin Road to the woods,

1 just short of 25, and that section will be unused until
2 such time the section is needed.

3 MR. RICKERT: Well, or a portion of Section C.

4 MR. COFFINBARGAR: Our intention is to build 62 two
5 intersection as part of Section B, and then C follows up
6 the next season, the next construction season, and at
7 minimum the intersection or build all of Section C. So
8 Section C will come there shortly after. We didn't want
9 to have a disruption of construction on 62 and
10 construction on 25 at the exact same time. Sometimes
11 you have to do that. We will see what happens, but we
12 are really trying to do the two sections, B first, and
13 then C next.

14 UNIDENTIFIED SPEAKER: It seems to me that it might
15 be two years before C is even started.

16 MR. COFFINBARGAR: C is targeted for the fall of
17 2017, but that is dependent upon acquisition. So we
18 will have to see if we meet that target, and then it
19 would be two years worth of construction. When would
20 the intersection of 25 be open to traffic and tie into D
21 to make that end connection could happen before the end
22 of those two years potentially, depending on
23 construction staging, but at the worse it would be two
24 years.

1 UNIDENTIFIED SPEAKER: So Section C would be --

2 MR. COFFINBARGAR: Three years from now, yes.

3 UNIDENTIFIED SPEAKER: How are the sections going?

4 MR. COFFINBARGAR: D is first. So this map shows
5 the entire alignment. It doesn't show the limits of
6 sections. Section D is along 62 and then headed west it
7 falls just short of Illinois 25.

8 UNIDENTIFIED SPEAKER: Okay. So C is the bridge
9 needed --

10 MR. COFFINBARGAR: No, not the bridge. C is the
11 Illinois 25 intersection, the bridge, and falls just
12 short of 31.

13 UNIDENTIFIED SPEAKER: C is here is going to be
14 Longmeadow and A --

15 MR. RICKERT: A we just built. It is done now.

16 UNIDENTIFIED SPEAKER: It is not tied into Randall.

17 MR. RICKERT: It is not tied into Randall, but that
18 is the next stage that is being led. So that will be
19 constructed over the next construction season.

20 UNIDENTIFIED SPEAKER: That's what I am getting at.
21 The bridge could be the last section built, correct?

22 MR. COFFINBARGAR: Could be.

23 MR. RICKERT: That's currently the plan. Stearns
24 Road, which is another bridge corridor, that took eight

1 stages and was done over a period of about two to five
2 years.

3 MR. COFFINBARGAR: A project of this magnitude
4 breaking it up engineering and for construction
5 contracts because the advantage, too, of having
6 independent construction contracts is that multiple
7 contractors and subcontractors are able to bid on the
8 various sections. Some are, you know, they are already
9 in building a tollway project and may not be able to bid
10 on this one, but the following year they are freed up
11 and they have staff and crews to work on it. So
12 splitting things up engineeringwise and constructionwise
13 is not unusual.

14 UNIDENTIFIED SPEAKER: My point of view, building a
15 road from Algonquin short of 25, that may be they are
16 disconnected for those three years. It seems to me that
17 should be done after the funds of the bridge are
18 received and the funds for the bridge are still at risk.
19 There is no concrete excess funding for the bridge
20 itself at this point in time. There is a referendum
21 pending in the future to apply for bonds to pay for it;
22 is that correct?

23 MR. RICKERT: No, no, there is no referendum. It
24 is not required. The funding of the bridge is actually

1 partially funded already.

2 UNIDENTIFIED SPEAKER: Partially.

3 MR. RICKERT: Partially, and there are some funds
4 that we are looking at potentially as through bonds, but
5 there is no referendum required.

6 UNIDENTIFIED SPEAKER: So there would be bonds for
7 Kane County that taxpayers would pay for?

8 MR. RICKERT: There possibly could be bonds. It
9 all depends on what funding is --

10 UNIDENTIFIED SPEAKER: If there was bonds, would
11 they be paid for by Kane County taxpayers?

12 MR. RICKERT: They will be paid as our current
13 bonds are and the bonds that we did in the past by Kane
14 County taxpayers. It is all existing funds that would
15 pay for it. There would be no new requirements of
16 funding. It would be all existing funds that are
17 currently being received by --

18 MR. COFFINBARGAR: Bonding by hiring purposes is
19 not unusual. We receive funds, and those can be used to
20 pay back funds. It is not additional taxes on the
21 taxpayers that would pay for these bonds.

22 MR. RICKERT: We do bonding quite often. Through
23 existing --

24 UNIDENTIFIED SPEAKER: The quantity of dollars is

1 gross.

2 MR. RICKERT: No. We pay them off pretty quickly.
3 We did a \$40 million on Stearns Road and paid it off in
4 five years. I mean, the bond fund goes up and down
5 because we receive bonds for various projects.

6 MR. COFFINBARGAR: We paid off that bond.

7 MR. RICKERT: Yeah, we just paid off the starting
8 bonds. It was five years ago it was paid off with the
9 existing funds. No new taxes.

10 UNIDENTIFIED SPEAKER: For the record, my great
11 concern is for the taxpayers of Kane County are in,
12 essence, quote, for the long-term of this project. The
13 taxpayers of our local geography closest to this project
14 have three times at three referendums refused to support
15 this project on a nonbinding referendum each of the
16 three times.

17 And the most recent referendum was almost
18 70 percent against this project, and yet the project
19 goes forward regardless of the local population in
20 Northern Kane County, which is opposed to it, even
21 though there are municipal executives who are in favor
22 of it. I would like to state for the record that if the
23 State of Illinois does hearing or reviewed this record
24 and they look into those records and see how much

1 opposition there really is. It is significant, it is
2 substantial, and it has been long-term against this
3 particular project.

4 There are other projects that were on the
5 record earlier, 10, 15 years ago, that go in a different
6 direction. It was crazy deals in certain townships --
7 towns within Northern Kane County, and between those
8 municipal executives there is a record of what
9 transpired.

10 MS. BREHMER: What type of bonds would they have
11 for the bridge?

12 MR. RICKERT: There are different options that are
13 available. Until we actually get to that point, there
14 is not a determination that has been made by the county
15 board, but there are different options that are
16 available.

17 MS. BREHMER: With the forest preserve, have you
18 looked at having culverts or land overpasses for animals
19 to be able to cross?

20 MR. RICKERT: That was part of the earlier
21 considerations. Everything has been designed and there
22 is openings that have been accommodated for the forest
23 preserve area.

24 MS. BREHMER: So is there culverts there or is

1 there land where they can go over the roadway?

2 MR. RICKERT: It is mainly in the frontages along
3 the river, there is openings that are available across
4 the land.

5 MS. BREHMER: So they are not --

6 MR. RICKERT: It is grade separation because they
7 go underneath the road.

8 UNIDENTIFIED SPEAKER: Where the abutments would
9 meet the bridge?

10 MR. RICKERT: Where the abutments would meet the
11 bridge.

12 UNIDENTIFIED SPEAKER: No other special other than
13 the bridge abutments?

14 MR. RICKERT: I think there were some improvements
15 that were done for one of the species that the
16 environmental agencies had us put in on the west side of
17 the river.

18 MR. COFFINBARGAR: There is the bike path that is
19 primarily for us, you know, to use that goes through the
20 forest preserve.

21 MS. BREHMER: Other states use them. Why can't
22 they do something like that?

23 MR. COFFINBARGAR: Well, additional improvements
24 such as that cost more money too. You know, there is

1 some folks who are worrying about us pursuing the bonds
2 while at the same time there is folks requesting to add
3 additional costs to the project, and when we did the
4 Wilber Smith Study, it was to see it's a totally viable
5 option. In fact, at that time we determined that it is.
6 If we did a four-lane roadway, we could charge \$1.50
7 toll, peek period and we could bond up to \$75 million.
8 That was sort of a feasibility on the toll option.

9 Since then we have been fortunate to get funds
10 from the State of Illinois and from the federal
11 government, tens of millions of dollars which has
12 brought down the necessity of the toll amount that would
13 currently have been the 30 million as I mentioned. So
14 we will keep pursuing those outside fund sources, and
15 even though I think we are tapped out, we will still
16 keep doing it to try to get that bond amount down even
17 further, and that reduces the toll. The toll is
18 currently a 50 cent peek period toll from the \$30
19 million bond.

20 MS. BREHMER: But you are putting a four-lane
21 roadway through a forest preserve. It seems like common
22 sense that you need to have culverts or areas that
23 animals can safely cross. Other states do it.

24 MR. COFFINBARGAR: There is a large box culvert

1 going in near just west of Forest Drive which will be
2 adequate for animals to cross through. I don't have the
3 dimensions memorized. I can look it up. It is a
4 sizable box.

5 MS. BREHMER: Where would I find that on the web
6 site so I can read about it?

7 MR. COFFINBARGAR: Well, the contract plans,
8 preliminary, pre-final, and final plans are all
9 available on the web side, I verified that yesterday,
10 and it includes -- now the documents are somewhat large,
11 4 to 500 pages, but on page 2 of the documents is an
12 index to the sheets that shows what sheet number it is,
13 and punch it in on the PDF and go to sheet No. 302 or
14 whatever it is for the drainage plans, and it will show
15 that box culverts.

16 If you need, you know, Karen Drive is within
17 Section B2, and I put all of the plans altogether and
18 they are halfway down the other documents section of the
19 web site. I can help you find them too. If you have
20 trouble, give me a call.

21 MR. RICKERT: The primary areas where the
22 environmental agencies have been involved with
23 engineering aspects, we do have land crossings
24 underneath the roadway, and we put that in to

1 accommodate these types of concerns. So in the forest
2 preserve there is along the river area where it is
3 wooded, not the farm wood area, but along the river area
4 where it is wooded there is open crossing areas, but not
5 the farm area.

6 MS. BREHMER: I will have to read about it.

7 MR. RICKERT: Most of the lunar property, close to
8 80, 85 percent is farm area. It is not a wooded
9 environmental area.

10 MS. BREHMER: Except for the.

11 MR. RICKERT: That's down by the river where the
12 old swallow river.

13 MS. BREHMER: Right they are all targeted to get
14 wiped out.

15 MR. RICKERT: No, only a few of them are. We are
16 not targeting --

17 UNIDENTIFIED SPEAKER: It has all the trees on it.
18 It's amazing how --

19 MR. RICKERT: The trees that are within the
20 roadway, those are the ones being removed. There is
21 also a number of trees that we are also protecting along
22 the corridor.

23 UNIDENTIFIED SPEAKER: Well, if we have an eminent
24 domain offering, what the cost are how much you are

1 buying them --

2 MR. RICKERT: If you are one of the property owners
3 that if you are one of these properties, we are
4 discussing negotiations right now.

5 UNIDENTIFIED SPEAKER: I mean --

6 MR. RICKERT: When everything is final in
7 accordance with the law, that information is released.
8 It is all in the resolution is approved by the county
9 board to pay the property owner. The amount is right in
10 the resolution. So you can look up the federal
11 acquisition resolution and it will show the amount.

12 UNIDENTIFIED SPEAKER: What is the amount of money
13 that has been spent up until this point in time?

14 MR. COFFINBARGAR: 35 million on engineering, land
15 acquisition, construction.

16 MR. RICKERT: And that's the primary stuff that we
17 have been doing over the last five or so years. There
18 were improvements that were done in the town 2000 to
19 about 2010 where there is probably about another 5 to 10
20 million dollars worth of improvements that were done.
21 And all that information is available, the total costs,
22 everything.

23 UNIDENTIFIED SPEAKER: On KDOT or --

24 MR. COFFINBARGAR: The Longmeadow Parkway portion

1 of the Kane County DOT web site.

2 UNIDENTIFIED SPEAKER: Thank you.

3 MS. BREHMER: So if we have any comments, do we
4 write them down or do we tell the court reporter?

5 MR. RICKERT: Yeah, there is a place over there to
6 write them down and there is a court reporter. We
7 specifically brought all the parcels. So you can see
8 all the other parcels that have been acquired. On
9 Longmeadow we have acquired about 80 to 90 percent of
10 the land. This is the remaining portion, and we can see
11 where the remaining portions generally are. The Karen
12 Drive area on Longmeadow is, that's the portion. The
13 quarry sites areas, has a number of sites there that we
14 have to acquire, and then the Autumn Trail sites. So
15 these are the sites that are remaining and that the
16 county is pushing forward with acquisition.

17 The Autumn Trial site, again, the State of
18 Illinois is the lead agency for Section D. This is
19 something that because of the statements of the Village
20 of Barrington Hills, this is something we recently added
21 in order to have all processes being considered. Right
22 now again IDOT is the lead agency for the land
23 acquisition in between 25 and 62.

24 MS. BREHMER: Now, has the State of Illinois given

1 the money for this project or is it just earmarked?

2 MR. RICKERT: They continue to give money. It is
3 programmed. We probably to date have received maybe 10
4 million or so to date. We receive the monies as we
5 progress. So we have not received all the funding, but
6 it is within their approved program. So those monies
7 are transportation funds that can only be used for
8 Longmeadow Parkway.

9 MR. COFFINBARGAR: There are larger costs
10 participation in than the construction portion and so we
11 fill out funding agreements with them to utilize federal
12 and/or state funds to fund portions of the construction
13 phases, and so those agreements are pursued right before
14 they go to construction. So within that Section A to
15 B1, utilize the federal funds, and then Sections B2, C
16 and D, we will be pursuing those agreements when they
17 are ready to go with construction. So we have already
18 submitted D for their consideration.

19 UNIDENTIFIED SPEAKER: Is it for Powell Road?

20 MR. COFFINBARGAR: Let me ask a question, because I
21 just want to make sure. It might be appropriate to
22 close out the hearing. The staff will still stick
23 around to answer questions, but I want to make sure that
24 everybody's time is honored. So if you want to write

1 something down or you want to talk to the court
2 reporter, we can do that. So my recommendation is that
3 we close out the hearing, and then, again, you can take
4 your opportunity as well as we remain until? Everyone
5 is gone.

6 MS. BREHMER: My name is Laura, L A U R A, Brehmer,
7 B R E H M E R. So my comments are the Long Meadows
8 Tollroad no longer makes sense. The traffic needs and
9 growth of the mid 1990s are long gone. This graceful
10 project is a prime example of the sunk cost fallacy,
11 throwing good money after bad. The sunk cost fallacy is
12 a mistake in reasoning in which the sunk cost of an
13 activity, instead of the future costs and benefits, are
14 considered when deciding whether to continue the
15 project.

16 So many millions have been spent, and you are
17 going to do whatever it takes to finish it even though
18 your own commission study shows it isn't needed and it
19 won't help ease congestion. It is easier to continue
20 the project than to explain the past costs that keeps
21 you trapped with this toll bridge project. Abandoning a
22 sunk cost that the money spent on Long Meadows Tollway
23 would be a sign of good decision making. Most of us
24 have made a decision sometime in our life that didn't

1 work out, but a key element in good decision making is
2 in knowing when to quit.

3 That's all. Thank you.
