Press Release

2019 Kane County Pavement Preservation Project Kane County Section No. 19-00000-01-GM

Starting the **June 11, 2019**, Kane County will finish the final portion of the Pavement Preservation project by applying crack seal and a micro-surface treatment to a portion of Tyrell Road in Gilberts, Illinois. Cracks will be sealed, followed by a dual layer of micro-surface hot-mix asphalt on top. Pavement preservation techniques utilize lower cost maintenance improvements conducted earlier in the life cycle of the asphalt pavement by reducing the water penetration that leads to freeze/thaw damage and preventing oxidation of the asphalt material. These treatments will extend the overall lifespan of the roadways. Construction work hours will be from **7:00am until 4:00pm each day for approximately two weeks**, weather permitting.

Tyrell Road will remain open during treatment, but will be reduced to one lane of travel using flaggers and temporary daily lane closures.

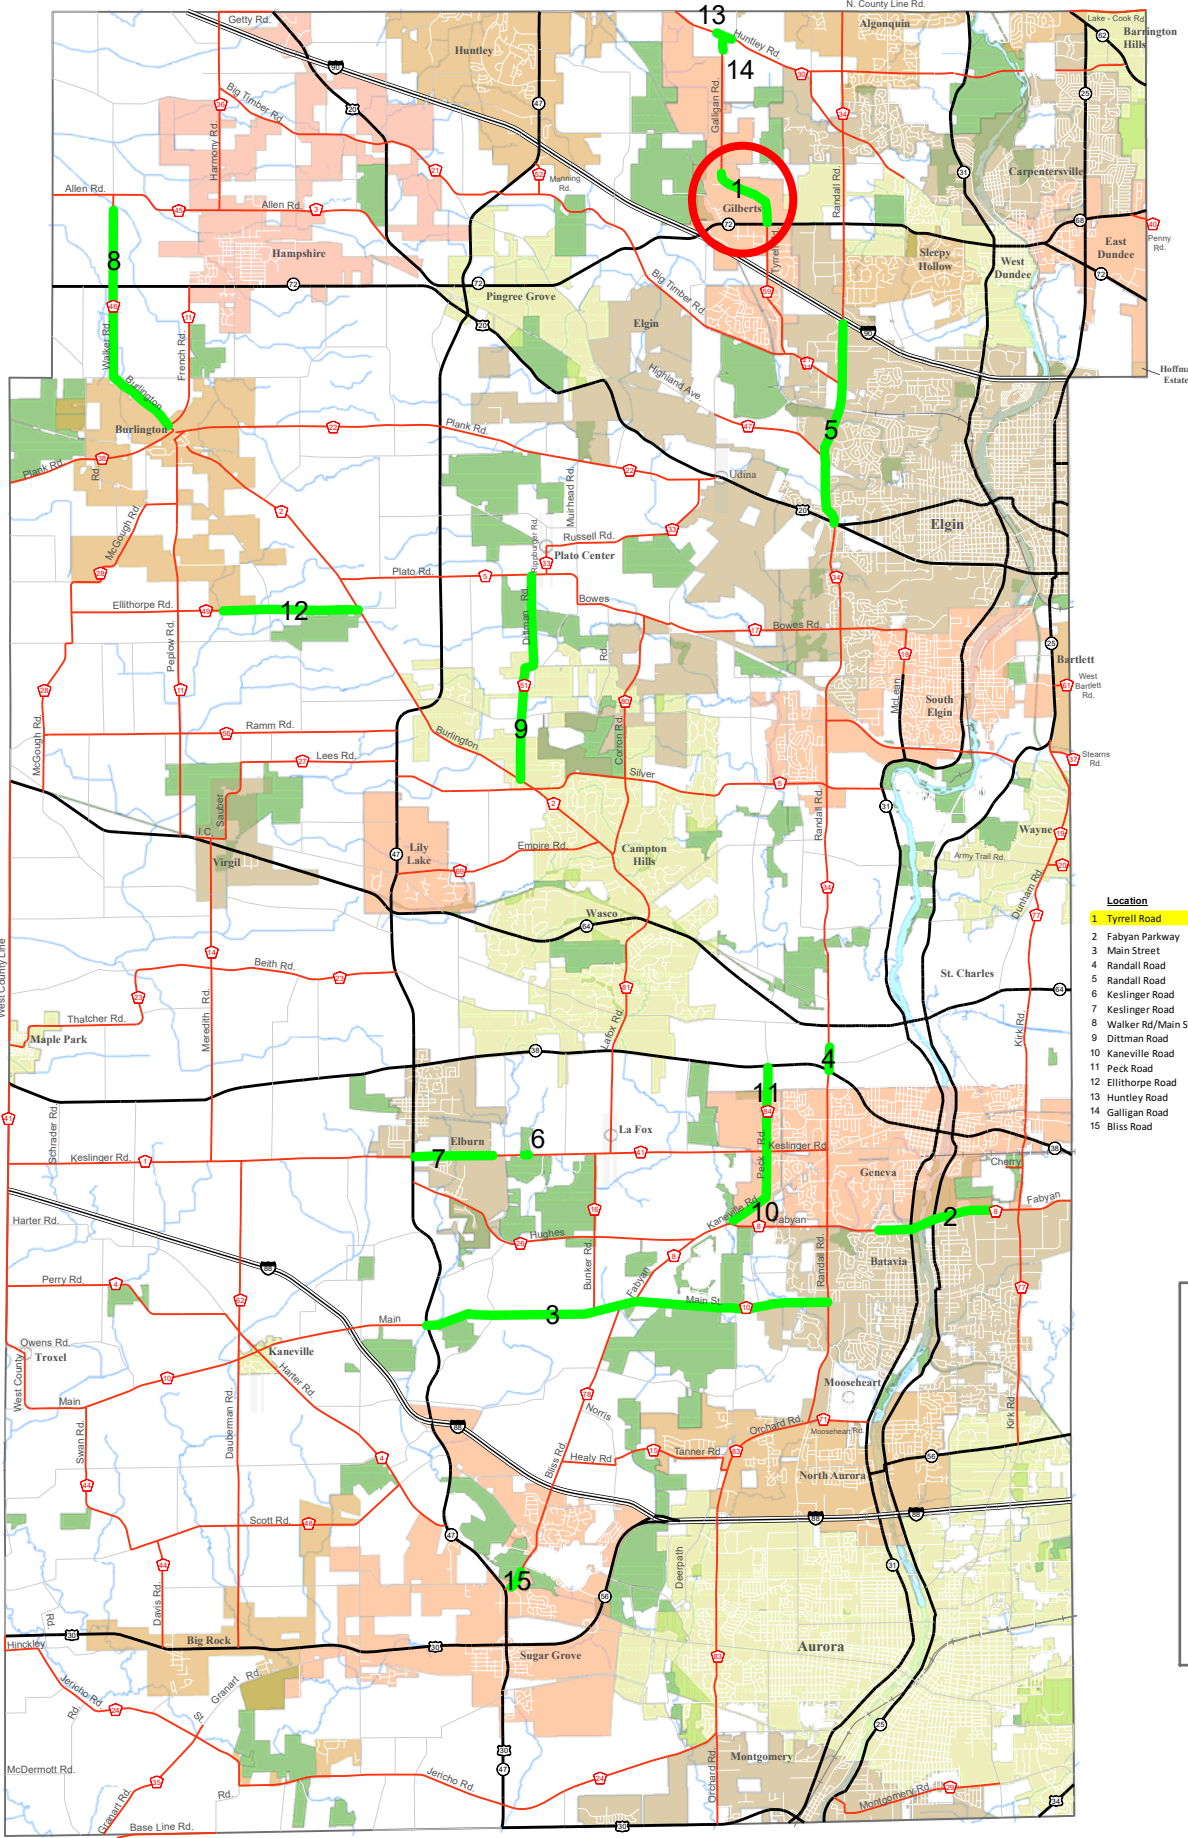

Motorists need to be prepared to reduce their speed, exercise caution, and be extra alert. Motorists must watch for construction workers, construction vehicles entering or leaving the site, and obey flaggers and other traffic control devices within the work zone. Motorists should expect long delays while traveling through the work areas. Motorists may want to add additional time to their commutes and consider the use of alternate routes while this work is being completed.

A reminder – **it is illegal for drivers to talk on a cell phone while driving through a highway construction work zone.**

Questions and concerns may be directed to Patrick VerHalen (630) 208-3138. For all Kane County Traffic Advisories, see <http://www.co.kane.il.us/dot/trafficalerts/Default.aspx>.
