- Silver Glen Road from Corron Road to Randall Road
- Main Street Road from Harter Road to Approx. 790' West of IL Route 47
- Meredith Road from McNulty Road to I.C. Trail

The Crack Sealing program is part of the County's annual comprehensive road maintenance program to increase the longevity of the roads by sealing road cracks which prevents water from penetrating the road base and reducing the life of the pavement.

All of the above-mentioned roads will remain open during treatment, but will be reduced to one lane of travel using flaggers and temporary daily lane closures. As the routing process may generate dust which can become airborne in windy conditions and water cannot be used to control this as it adversely affects the crack filling, drivers may want to avoid the roads while routing is being performed.

Visit our [Traffic Advisories](#) webpage for more information on road closures, detours, and active KDOT projects.

*Motorists should expect delays while traveling through the work areas, consider alternate routes and expect additional commute time. Motorists are asked to reduce their speed, watch for construction workers and vehicles entering and leaving the site and obey flaggers and traffic control devices. **It is illegal to talk or text on a cell phone while driving.***
